

Commissioners
Superintendent's Report

August 3, 2026

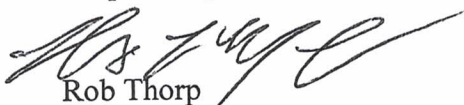

System Usage	2026	2025
July	9,945,931	10,330,000
Daily Average	320,836	333,225
Max Daily	510,040	400,000
Year to Date	51,809,222	48,800,000

1. A&D Instruments has our new FCC License and will be here next Monday to reprogram the new frequency.
2. Micah Seneca has completed the service line identification list for this year. No lead or galvanized service lines were found.
3. The roofers have started on the pump station roof. It looks like it is about half done. The weather has not been cooperating.
4. I signed the contract for the tank repair with DN Tank. Now, we're just waiting for them to get us on the schedule.
5. Tony inspected the Montessori School, and the water was turned on.
6. Cyber security has been in the news recently involving public water systems. We have had no issues but continue to be on alert. It is unlikely that we will see such a problem. If a problem were to occur, it would be minor as our system is very basic and we can run the entire system manually.
7. The Main St. Water Main Replacement project is in the process of closing out. The record drawings are done, and we should have them soon. Jordan Brock from Underwood is giving them one more review.
8. I'm looking into a new water meter brand. The meter name is Badger. They are all mechanical and rebuildable with no batteries. The company that sells them is Stiles Company and they may have some other options for reading equipment as well.

Workload

Backflow Testing
Curb and Gate Repairs
Perley Rd.
Spillway @Pond

Respectfully Submitted,

Rob Thorp
